

The role of solar tiles

Overview

The installation of photovoltaictiles should be considered if you are building a building from scratch. Having a high installation cost (which produces considerable savings in approximately 5 years), solar roof tiles are commonly used in corporate buildings that seek certifications related. - Solar tiles are an excellent source of renewable energy for regions with high solar incidence. - They are visually more attractive and discreet than traditional photovoltaic panels since they are part of the roof. - They are new to the market and, therefore, are even more expensive than traditional photovoltaic panels. - There are still few solar tile manufacturers and few skilled laborers for its installation. Some of.
