# **Three-phase photovoltaic inverter grid connection**

## **Overview**

Two sets of files are proposed, suitable for implementing the control and simulating its behavior in MATLAB Simulink or Plexim PLECS environment. The file below contains the PLECS model with a Hardware-In-the-Loop (HIL) configuration that can be used with the B-Box RCP together. The objective of this section is to provide the main steps to operate the three-phase PV inverter. For a detailed guide on how to build and test one from the power electronics test bench, please refer to PN171.
